

# E.C.M. Machines Ltd.

*Custom design and build Automated Machinery*

*est. 1994*

## Customized Equipment

Experienced in design/build of automated machinery. Specializing in automatic tube and wire benders. All bending equipment utilizes compression and form tooling into the machine. Designed and built to customers specifications utilizing new technology and experienced engineering.

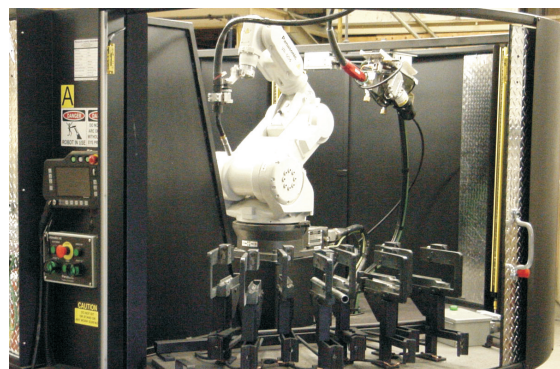

## Engineered Products

Every order is treated with top priority ensuring all components are designed to meet the customers specifications and approval. With every aspect being built in house, customers now have a one stop turn-key solution for their automation problems, making large projects simple and easy for the buyer. All engineered products are designed in 3D cad to the customer specifications.

## Goals & Commitments

ECM Machines Ltd. has design/built many processes and automated equipment from very large Robotic assemblies, to very small hand jigs. We also offer simple machining and custom parts through CNC or other processes. At ECM Machines Ltd., our goal is provide quality equipment that stand the test of time. As part of our goal we will guarantee to our customers limited timelines and tight budgets to get their products to their customers on time and budget.

**WE HOPE TO HEAR FROM YOU AND WORK TOGETHER IN SOLVING FUTURE ENDEAVORS.
